- in starchy foods, glycemic index and, 873
- Plant genetics, 259S
- Plasmid, 249S
- Plasminogen, Buddhist vegetarian diet and, 354
- Platelet(s),  $\alpha$ -tocopherol, retinol, and  $\beta$ -carotene in, effect of dietary fish oil with/without vitamin E supplementation, 98
- Polymerase chain reaction, 249S
- Pregnancy
- dietary fiber intake and insulin sensitivity (*letter*), 118
- folic acid supplementation, 127
- in insulin-dependent diabetes mellitus, perinatal care and successful lactation and breast-feeding, 43
- iron supplementation in, gastric delivery system, 622
- outcome
- maternal energy and protein supplementation and, 627
- modeling maternal weight and height in studies of, in Hispanic women, 145
- Premenstrual syndrome (PMS), late luteal dysphoria and food intake (*letter*), 712
- Preterm birth, maternal energy and protein supplementation and, 627
- Prolactin, in milk, mothers with insulin-dependent diabetes mellitus, 49
- Protein(s)
- dietary intake
- effect on insulin requirements and gluconeogenesis in insulin-dependent diabetes, 555
- infants, growth velocity and, 152
- radial bone mass in young women and, 537
- urinary excretion of calcium and acids and, 398
- fructosylation, Maillard reaction, 779S
- milk, of transgenic animals, genetic modification of, 299S
- in starchy foods, glycemic index and, 873
- supplementation, maternal, pregnancy outcome and, 627
- Public health issues, dietary fructose, 820S
- Purified protein derivative (tuberculin), proliferative responsiveness of T lymphocytes to, in children supplemented with vitamin A and zinc, 566
- Pyridoxine. *See* Vitamin B-6
- Quantitative genetics, animal production, 276S
- Recombinant DNA technology
- animal production, 276S
- in growth hormone studies, 296S
- introduction, 249S
- Recommended dietary allowances (RDA), vitamins, elderly people, 4
- Red blood cells. *See* Erythrocyte(s)

- Renal acid, urinary excretion, dietary intake and, 398  
 Respiratory quotient, assessment, methodological reappraisal, 592  
 Restriction endonuclease, 249S  
 Restriction fragment length polymorphism, plant breeding, 259S  
 Retinol. *See also* Vitamin A  
   in blood components, dietary fish oil and vitamin E supplementation and, 98  
   serum  
     diarrhea and, in Peruvian children, 110  
     illness and, 192  
     in undernourished Sahelian toddlers, 91  
 Retinyl palmitate, fish oil supplementation and, 68  
 Reverse transcriptase, 249S  
 Riboflavin  
   deficiency, milk intake and, in elderly Guatemalan people, 85  
   RDA, elderly people, 4  
   supplementation, in elderly Guatemalan people, 85  
 RNA polymerase, 249S  
 Respiratory gas exchange, effects of infused sodium acetate, sodium lactate, and sodium  $\beta$ -hydroxybutyrate, 608
- S*-adenosyl-*L*-methionine, in alcoholic liver disease, 430  
*S*-adenosylmethionine, pancreatic, in early folate deficiency (rat), 198  
 Satiety, mycoprotein and, 507  
 Selenite, supplementation, infant formula, 643  
 Selenium, status  
   infants, 643  
   lactating women, source of selenium and, 649  
 Selenium yeast, supplementation, maternal  
   infant's selenium status and, 643  
   selenium status and milk selenium concentration and, 649  
 Selenomethionine, supplementation, maternal  
   infant's selenium status and, 643  
   selenium status and milk selenium concentration and, 649  
 Sickle cell disease, resting metabolic rate in (*letter*), 710  
 SI units, conversion of insulin units to (*letter*), 714  
 Skeletal muscle  
   disuse atrophy, zinc and copper balances in, 897  
   glycogen, preexercise fructose feeding and, 815S  
   hypertrophy, large-scale weight loss and resistance training and, 561  
 Skin  
    $\beta$ -carotene accumulation in (*letter*), 713  
   thickness, age-related decline, serum 25-hydroxyvitamin D and, 882  
 Somatotropin  
   recombinant bovine, metabolic effects in lactating dairy cows, 282S  
   recombinant porcine, mechanisms of decreased adipose tissue growth (pig), 287S  
 Soy protein, hypocholesterolemic effect, 501  
 Spaceflight  
   nutrition and physiological adaptations to, 583  
   zinc and copper balances during and after, 897  
 Stable isotope studies, zinc absorption  
   in healthy elderly population, 690  
   quantity of zinc ingested and, 533  
 Starch granules, in starchy foods, glycemic index and, 873  
 Stare, Frederick J., National Dairy Council Award for Excellence in Medical/Dental Nutrition Education, 425, 443  
 Stearic acid, dietary, adipose tissue deposition (rabbit), 174  
 Sterols, neutral and acidic, fecal excretion in infants, dietary taurine and, 349  
 Storage protein, modification of maize-seed-protein quality, 264S  
 Stress, in healthy men, maintenance of iron status during, 923  
 Sucrose, fructose component. *See* Fructose  
 Sunlight exposure, serum 25-hydroxyvitamin D and, effect of skin thickness, age, and body fat, 882  
 Sweeteners  
   fructose. *See* Fructose  
   intense, effect on appetite (*letter*), 120  
 Syrup, high-fructose  
   manufacturing, composition, and applications, 724S  
   worldwide production, 733S
- Taurine, dietary, effect on synthesis of neutral and acidic sterols and on fat absorption in infants, 349
- Teller Acuity Card procedure, visual acuity development in healthy pre-term neonate, marine-oil supplementation and, 35  
 Tetanus toxoid, proliferative responsiveness of T lymphocytes to, in children supplemented with vitamin A and zinc, 566  
 Thermogenesis  
   diet-induced  
     assessment, methodological reappraisal, 592  
     fructose and, 766S  
   energy expenditure in modulation of body fat and protein deposition during catch-up growth after early undernutrition (rat), 614  
 Thiamin, RDA, elderly people, 4  
 T lymphocytes, proliferative responsiveness in children supplemented with vitamin A and zinc, 566  
 $\alpha$ -Tocopherol  
   in blood components, dietary fish oil and vitamin E supplementation and, 98  
   supplementation, low-density lipoprotein oxidation and, 525  
 Trace elements  
   bioavailability, fructose and (rat), 771S  
   food restriction and effects of severe copper deficiency (rat), 891  
   status, misclassification due to infection, 549  
   zinc and copper balances during and after long-term bed rest, 897  
 Tracking, lipid/lipoprotein profiles of individuals 9-21 years of age, 61  
 Transferrin saturation  
   measurement, phase of menstrual cycle and, 705  
   relation to iron deficiency in Venezuelan children, 215  
 Transgenic animals  
   in growth hormone studies, 296S  
   lactating, genetic modification of milk components in, 299S  
 Triacetin  
   metabolism of triacetin-derived acetate (dog), 908  
   parenteral administration, effects on leucine metabolism (dog), 912  
 Triacylglycerols  
   future prospects for genetic modification of fatty acid composition of edible plant oils, 270S  
   postprandial response, amylose content of meal and, 180  
 Triceps skinfold thickness, maternal weight-loss patterns during breastfeeding, 162  
 Triglyceride(s)  
   fish oil supplementation and, 68  
   plasma, dietary fructose and, 800S  
   serum, Buddhist vegetarian diet and, 354  
   short-chain  
     metabolism of triacetin-derived acetate (dog), 908  
     parenteral administration, effects on leucine metabolism (dog), 912  
 Tuberculin (PPD), proliferative responsiveness of T lymphocytes to, in children supplemented with vitamin A and zinc, 566  
 Tubers, glycemic index, 873  
 Tumor necrosis factor, resting energy expenditure in AIDS and (*letter*), 715
- Undernutrition  
   energy expenditure in modulation of body fat and protein deposition during catch-up growth after early undernutrition (rat), 614  
   vitamin A deficiency and, in Sahelian toddlers, 91  
 Underwater weighing, total body fat, magnetic resonance imaging assessment vs., 830  
 Uric acid, serum, Buddhist vegetarian diet and, 354  
 Urine  
   calcium and acid excretion, dietary intake and, 398  
   carnitine excretion, dietary macronutrient content and, 868  
   zinc concentration, postprandial response in women, 695
- Valproic acid, for epilepsy, nutritional status and growth in children and, 858  
 Vegetarian  
   feces and fecal water content of bile acids, 917  
   hemostatic and lipid profiles in Buddhist vegetarians, 354  
   renal adaptation to dietary carnitine, 660  
   serum 25-hydroxyvitamin D concentrations and secondary hyperparathyroidism in, 684  
 Ventricular fibrillation, threshold, n-3 and n-6 polyunsaturated fatty acids and (monkey), 666

- Vertebra, compression fractures, vitamin D status and, in white women living in tropics vs. higher latitudes, 106
- Visual acuity, development in healthy preterm neonate, marine-oil supplementation and, 35
- Vitamin(s)
- dietary intake, estimated prevalence of inadequate intakes of toddlers, 376
  - recommended dietary allowances, elderly people, 4
  - requirements, of elderly people, 4
  - supplementation, low-density lipoprotein oxidation and, 525
- Vitamin A. *See also* Retinol
- dietary intake, xerophthalmia risk and, 385
  - nutrient-nutrient interactions and growth in urban Bangladesh school-children, 334
  - RDA, elderly people, 4
  - status
    - conjunctival impression cytology in, 167
    - diarrhea and, in Peruvian children, 110
    - illness and serum retinol in children, 192
  - supplementation
    - T lymphocyte proliferation in children and, 566
    - xerophthalmia risk and, 385
- Vitamin A deficiency
- risk of, vitamin A supplementation and dietary vitamin A and, 385
  - undernutrition and, in Sahelian toddlers, 91
- Vitamin B-6
- deficiency, in elderly population, 468
  - RDA, elderly people, 4
- Vitamin B-12
- deficiency
    - in elderly population, 468
    - folic acid supplementation and, 127
  - RDA, elderly people, 4
- Vitamin C. *See also* Ascorbic acid
- dietary intake, glycosylated hemoglobin concentration and, 412
  - RDA, elderly people, 4
- Vitamin D
- deficiency
    - secondary hyperparathyroidism in elderly population and, 187
    - secondary hyperparathyroidism in vegetarians and, 684
  - RDA, elderly people, 4
- Vitamin E
- dietary intake, glycosylated hemoglobin concentration and, 412
  - modulation of dietary fish-oil induced changes in  $\alpha$ -tocopherol, retinol, and  $\beta$ -carotene in blood components, 98
  - RDA, elderly people, 4
- Vitamin K
- RDA, elderly people, 4
  - status, phyloquinone transport and osteocalcin carboxylation in hemodialysis patient, 204
- Walking, energy expenditure of elderly vs. middle-aged women, 15
- Wasting, in AIDS, 417
- Weight cycling
- body composition and (*letter*), 243
  - visceral fat accumulation and, 853
- Weight loss
- body fat distribution and, in premenopausal women, 29
  - effect of dietary fat during energy restriction (rat), 846
  - fructose and, 766S
  - large-scale, muscle hypertrophy in, 561
  - maternal, during breast-feeding, 162
  - patterns, in AIDS, 417
- Wheat bran, zinc oxide-fortified breakfast cereal, zinc absorption from, 902
- Whole-gut lavage technique, measurement of zinc bioavailability from beef and ready-to-eat high-fiber breakfast cereal, 902
- Xerophthalmia, risk of, vitamin A supplementation and dietary vitamin A and, 385
- Yeast artificial chromosome, 249S
- Zinc
- absorption
    - from beef and ready-to-eat high-fiber breakfast cereal, 902
    - in healthy elderly population, 690
    - quantity of zinc ingested and, 533
  - balance, prolonged bed rest and, 897
  - dietary intake, in epileptic children, anticonvulsant therapy and growth in, 858
  - dietary restriction, postprandial response of plasma zinc and, 702
  - metabolism, fructose and (rat), 771S
  - nutrient-nutrient interactions and growth in urban Bangladesh school-children, 334
  - plasma, postprandial response, 695
  - dietary zinc restriction and, 702
  - serum, infection and, 549
  - status
    - folic acid supplementation and, 127
    - misclassification due to infection, 549
    - supplementation, T lymphocyte proliferation in children and, 566
- Zinc oxide, fortification of breakfast cereal, zinc absorption from, 902
